SKILLS

Languages: Python, JavaScript (ES6+), SQL, C++, C
Frontend: ReactJS, NextJS, Vite, HTML5, CSS3, Tailwind CSS, Redux
Backend: FastAPI, Node.js, RESTful APIs, SQLAlchemy
Tools & DevOps: Git, GitHub, AWS (EC2, Amplify), Postman

WORK EXPERIENCE

TRUSTY TRANSIT | Full Stack Developer   Jul 2025 – Oct 2025

- Architected a high-performance supply chain dashboard using **React.js** and **Vite**, significantly improving load times and user experience compared to legacy systems.
- Integrated robust **RESTful APIs** to enable real-time order tracking, inventory management, and dynamic product catalog updates.
- Implemented responsive, component-based UI patterns to ensure cross-device compatibility and scalable frontend architecture.

BRANDERTISE | Web Developer & Automation Engineer   Nov 2023 – April 2025

- Engineered custom **Python** automation scripts (using Selenium/BeautifulSoup) for competitor product analysis and market data scraping, reducing manual research time by 40%.
- Developed and customized **Shopify** storefronts using Liquid and JavaScript, optimizing site performance and conversion funnels.
- Automating inventory synchronization workflows to streamline operations and minimize data entry errors.

IIRISCONSULTING | Freelance Frontend Developer   Aug 2023 – Oct 2023

- Built responsive, accessible client interfaces using **React.js** and **Bootstrap**, adhering to modern web standards.
- Collaborated with UX teams to implement A/B testing strategies, utilizing Google Analytics data to drive a 15% improvement in engagement.
- Integrated client-side state management with **Redux** to ensure seamless data flow across complex application modules.

BEANS.AI | Software Engineer Intern (Data Focus)   Dec 2022 – Jun 2023

- Optimized complex **SQL** queries for large-scale search datasets, enhancing data retrieval speeds and overall system performance.
- Developed automated **Python** ETL scripts to process and cleanse geodata, supporting accurate search query analysis.
- Collaborated with engineering teams to implement data-driven improvements to the core search algorithm and UI.

PROJECTS

FULL STACK PRODUCT DASHBOARD ↗   FastAPI, React.js, SQLite, Tailwind

- Developed a comprehensive product management system featuring a high-performance **FastAPI** backend and **React** frontend.
- Implemented secure user authentication (JWT) and persistent data storage using **SQLite** and **SQLAlchemy**.
- Designed a modern, responsive user interface with **Tailwind CSS**, supporting dynamic product CRUD operations.

REALTOR (REAL ESTATE PLATFORM) ↗   Next.js, SSR, API Integration

- Leveraged **Next.js** Server-Side Rendering (SSR) to optimize property listing pages for speed and SEO.
- Built dynamic routing and filtering systems to handle large datasets of property listings efficiently.

PERSONAL DEVELOPER PORTFOLIO ↗   Next.js, Tailwind CSS, Magic UI

- Built a modern, high-performance portfolio using **Next.js 14** with server-side rendering and Framer Motion animations.

- Integrated distinct **Magic UI** components for an engaging user experience, achieving a 100/100 Lighthouse performance score.
